

Themes	Subtopics
<b>1. Arthritis</b>	Arthritis – wrist, small joints including arthroplasty  Rheumatoid arthritis  Wrist biomechanics, Wrist rehabilitation
<b>2. Innovation / diagnostics / research / technology</b>	Innovation; Diagnostics in hand/wrist surgery; Basic research; Tissue engineering; 3D applications; Artificial intelligence; Robotics
<b>3. Minimally invasive surgery</b>	Arthroscopic surgery: Small joints, wrist, Ulnar side wrist pain; Distal radio-ulnar joint  WALANT  USS guided minimally invasive surgery
<b>4. Nerve &amp; brachial plexus</b>	Brachial plexus  Nerve compression syndromes; Nerve pain  Nerve repair/reconstruction  Nerve transfer; Neuroma, CRPS  Tendon transfer for paralytic conditions
<b>5. Paediatric / congenital / spasticity</b>	Congenital malformations  Tetraplegia and spasticity
<b>6. Rehab, outcomes, publishing &amp; patient-focused care</b>	Pathways  Outcome measures  Patient education/communication.  Rehabilitation (other than tendons)
<b>7. Tendon &amp; soft tissue conditions/reconstruction</b>	Tendinopathy  Tendon repair surgery, Tendon rehabilitation  Soft tissue reconstruction  Dupuytren’s disease
<b>8. Trauma</b>	Hand fractures and ligament injuries  Distal radial fracture; Scaphoid fracture; Scaphoid reconstruction, other carpal fractures.  Lacerations
